

INVISION™ Virtual Clerk Portal

EASY DATA ACCESS

Residents and customers log in with their account ID and a personal PIN. Security is built in, access is simple, and there's no complicated setup on either end.

LOW COST DEPLOYMENT

vClerk requires no database on your host website. That means lower implementation costs, less technical complexity, and a faster path to go-live without a heavy IT investment. Communities of any size can deploy a professional self-service portal at a fraction of the cost of traditional enterprise solutions.

SIMPLE INTEGRATION

vClerk connects seamlessly to your existing website and INVISION Data using modern technology. Your residents experience one smooth, cohesive portal and your team avoids a complicated rollout.

Virtual Clerk

- Offers convenient access 24/7
- Extends your office hours
- Alleviates routine information requests
- Saves staff time & resources
- Flexible electronic bill and payment options

vClerk Web Portal

Connecting Communities to the Information They Need — 24/7

Your residents want fast, easy access to their account information. With vClerk from Northern Data Systems, they have a secure, self-service web portal built for municipalities and utilities, delivering real-time account access and payment options directly through your existing website, around the clock.

What vClerk Does for Your Community

vClerk gives property owners instant access to the information that matters most:

- Property assessments and tax bill information available on demand, any time of day
- Current account balances and payment history always up to date and easy to find
- Flexible payment options that fit how people live, online, on mobile, or by phone
- Secure browser-based login account ID and personal PIN access with no software downloads required

Serve Your Community Better, Starting Today

vClerk gives your community the convenience and flexibility they expect, while giving your organization a smarter, more cost-effective way to deliver it.
