

INVISION™ Virtual Clerk

EASY DATA ACCESS

Access to account information is done through the use of account identification and a PIN, which insures that the data is secure as well as easy to access by your consumers.

LOW COST DEPLOYMENT

Virtual Clerk's creative design alleviates the need to have a database resident on the host website, which makes the implementation far more cost effective and less complex for communities to deploy and to manage.

SIMPLE INTEGRATION

Virtual Clerk utilizes state-of-the-art technology to create a seamless, but simple integration between your existing website and the INVISION System.

Virtual Clerk

- Extends Your Office Hours
- Offers Convenient Access 7/24/365
- Alleviates Routine Information Requests
- Reduces Paper Usage
- Saves Staff Time & Resources
- Reduces Your Carbon Footprint

Virtual Clerk Provides 7/24/365 Access

Virtual Clerk™ is an exciting service offering for the local government marketplace. Virtual Clerk utilizes the power of the Internet to connect communities closer to their residents than ever before. Using the web and a browser, individuals can access data from virtually any place in the world without having to pick up the phone or visit your office, 7 days a week, 24 hours a day.

Information such as property values, assessing data and tax payments can now be accessed by individuals without the need for expensive IT infrastructure. Virtual Clerk allows today's communities to serve individuals at the highest levels and allows valuable staff resources to focus on other important tasks instead of answering repetitive questions.

State-of-the Art Technology

Virtual Clerk utilizes state-of-the-art technology to create a seamless, but simple integration with your existing INVISION system. Virtual Clerk moves data at a scheduled time or on demand from your server and puts it on the web by creating an XML island. This minimizes the IT infrastructure requirements yet provides a robust and feature-rich user experience.

Customizable

Unlike other types of web services that simply allow static access to brochure like information, Virtual Clerk has the ability to create and manage personalized custom views of data for different types of data consumers. Virtual Clerk can maintain special views with key information for data intensive customers like realtors, insurance agents and banks, while providing a more simplistic view for the general public. These different views help your community serve the specific needs of diverse groups without the need of maintaining multiple web sites. It can even provide an avenue of revenue generation through subscriptions and charges for these specialty data views.
