

Enterprise Backup Management System

FAST RECOVERY

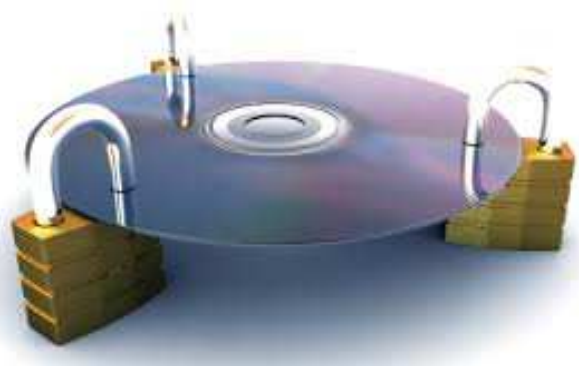

If you ever need to recover data the NDS team of support professionals can quickly restore the most recent backup to your system in a timely and secure fashion.

COMPLETE CONFIDENCE

You can be completely confident that the right process and procedures are in place to minimize risk associated with any loss of data.

EASE OF USE

Enterprise Backups are completely automated and require no intervention by the user. Data is backed up and replicated automatically via the Internet to NDS's dedicated Backup Servers in our state-of-the-art data center. Confirmation emails are sent to customers stating the status of the backups. The system is designed with an emphasis on ease of use.

Protect What Matters Most

- Protect **your mission critical data**, in a secure a risk free manner.
- Combine data replication and backup with off-site storage into one affordable solution.
- Enjoy the same enterprise-class protection once reserved for large companies.
- Minimize the risk associated with loss of data or with data corruption.

When All Else Fails

Despite the best intentions and pro-active measures to enhance data security and follow backup procedures, your system is always vulnerable to loss of data. There are many risks to your data including man-made or unintentional acts of God. Whether or not the loss of data has devastating consequences for your system may depend on the effectiveness of your backup and recovery process. Implementing Northern Data Systems Enterprise Backup Management guarantees that your data is always safe and can always be recovered when you need it most.

Enterprise-Class Data Protection

The Enterprise Backup Management System from NDS covers all four backup and recovery steps and combines them into one easy to use service. Your data is backed up without human intervention and replicated automatically via the Internet to NDS' Enterprise Backup Servers in our state-of-the-art data center. These backups are then automatically replicated to our off-site co-location facility. In the event that you need to recover data our team of support professionals can restore your most current data to your system in a timely and secure fashion.
