

# EDIFICE™ Mobile Work Orders

## SCHEDULING/DISPATCH

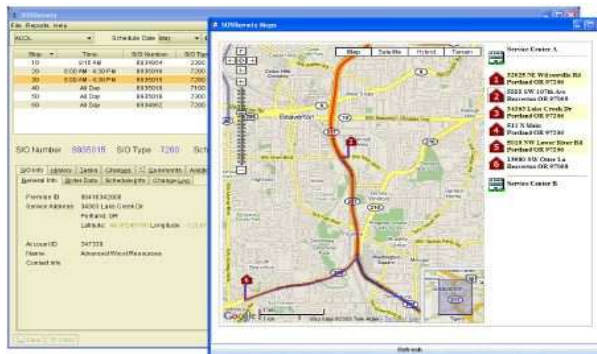

NDS' EDIFICE Remote Work Order has a fully featured scheduling /dispatch software that allows equipment and staff to be tracked for customer and infrastructure work. Work orders are created and dispatched directly from the scheduling/dispatch.

## INVENTORY

Inventory items are available to the technician in the field. Inventory used in the field is entered by the technician and transmitted back with the completed work order.

## SERVICE HISTORY

EDIFICE Mobile Work Orders maintains a complete history of all service requests and work performed at a customer location. Technicians can easily see the customer service history on their device (laptop, tablet, smartphone) in the field.

- Operates in connected and disconnected modes
- Improves service efficiency
- Eliminates paper work orders
- Eliminates searching for lost work orders
- Eliminates call backs to the office for location information such as service or read history
- Immediate processing of completed work orders
- Real-time work order dispatch to field technicians

## Automating Your Utility's Workforce

Field technicians complete work orders with minimal steps using the customized Closing Wizards.

## NDS' EDIFICE Mobile Work Orders

NDS' EDIFICE™ Mobile Work Orders offers field technicians a paperless way to complete their work assignments real-time. Mobile Work Orders is designed to operate on virtually any device and works for all service territories – even those with spotty connectivity. Mobile Work Orders extends EDIFICE Service Management directly into the field and is integrated with Service Billing/Jobbing and Inventory, creating a seamless transaction and workflow environment from the field to the back office.
